

Cellular Shades Collection & Odysee™ Cellular Blinds

Comfortex
WINDOW FASHIONS

Energy Efficiency. Reliability. Style. Find it all in the most comprehensive collection of cellular shades, cellular blinds and pleated shades.

*Comfortex Window Fashions has mastered the art of the **cellular shade**. The most energy efficient fabrics harmonize with the latest colors and hardware options to unite the elements of form, function and individuality.*

Odysee Cellular Blinds leave a lasting impression. The only window treatment of its kind, Odysee provides the convenient operation of a blind with the soft fabric look and insulating benefits of a cellular shade.

*Sleek styling is the signature of the **Privada No-Holes Privacy Pleated Shade**. The lift cords remain hidden, extending down the back of the shade fabric for elegant, continuous lines.*

Discover comfort

Symphony® Light Filtering fabric in color Nocturne

Comfortex Cellular Shades provide superior energy efficiency to keep rooms warmer in winter and cooler during the summer months.

The double and single cell honeycomb available in ½-inch, ⅜-inch and ¼-inch cell sizes help regulate temperature, block drafts and reflect incoming solar rays. The result is year-round comfort with the benefit of lower heating and cooling costs.

For ultimate insulating benefits, add the ComforTrack™ Energy Saving Sidetrack System to your cellular shades. This innovative system seals gaps where the shade and window frame meet, eliminating drafts, reducing your energy bills, improving light control, and increasing the comfort of your home. Easy installation and versatile color options make ComforTrack the right choice for the energy conscious home owner.

Fusing function with style

With an extensive array of colors and textures including neutrals, tints and subtle tones, as well as vivid selections, Comfortex Cellular Shades will complement your home's current decorating style or highlight the latest design trend.

With over 500 inspiring texture, color or pattern options, you are sure to find the right fabric and light control for your space. The four opacity levels found with Comfortex Cellular Shades produce dramatically different lighting and privacy effects. Choose from semi-sheer, light filtering, room darkening or blackout to best fit your space.

For the ultimate in light control, SlumberShades™ combine Comfortex's blackout cellular shade fabric with light blocking sidetracks to help create a comfortable, completely dark room for sleeping.

Comfortex Cellular Shades have neutral white fabric backings to reflect heat from the sun. This also provides a uniform look from the exterior. In addition, Comfortex Cellular Shades protect against the sun's harsh UV rays that can fade and potentially damage upholstery and drapery fabrics, carpeting, furniture, floors, as well as valuable artwork.

Windows come in all shapes

Decorative cellular shades can accommodate geometric windows, allowing you to coordinate your window coverings across all types of windows and doors. Stationary or movable specialty shapes cover arches, octagons and trapezoids. Transoms, sidelights, sliders and doors have their own Comfortex hardware applications. Fully functional skylight and greenhouse systems are engineered for challenging roof angles.

Trapezoid Shades

Sunset™ Movable Arches

Starburst™ Movable & Non-Movable Arches

Soprano™ Skylight & Greenhouse Shades

Octagon Shades

Balcony™ Skylight Shading Systems

Mezzo Motorized Skylight System

Ovation™ Cellular Slider

Innovative Hardware

Create the ideal cellular or pleated shade with hardware that fits your lifestyle.

CONTROL OPTIONS

CORD LOCK SYSTEM

The classic cord pull system for standard rectangular shades is easy to raise and lower, with hardware color coordinated to the fabric for a clean, integrated look.

CORD LOOP SYSTEM

The convenient single continuous pull cord is simple to operate; ideal for large windows.

CORDLESS ULTRA™ HARDWARE SYSTEM

Push the handle up or pull down to position your shade. This child safe solution eliminates dangling pull cords, perfect for homes with young children and pets.

CORDLESS LIFT & LOCK SYSTEM

Cordless Lift & Lock Shades can be raised or lowered by pressing the button located on the bottom rail and guiding the rail into the desired location. Provides safety and style for homes with young children and pets.

MOTORIZATION

Easy, remote-control operation of your cellular shades using radio frequency motorization, wall switches and controls. Modern convenience without any operating cords.

DESIGN OPTIONS

METALLIC HARDWARE

Brushed Nickel or Oil Rubbed Bronze hardware provides a sophisticated, contemporary look that coordinates with stainless appliances and other metal fixtures. Available on all shades using Cord Lock, Cord Loop and Cordless operating systems.

FABRIC WRAPPED RAILS

Create a completely seamless look on your cellular shades with fabric wrapped rails. The fabric used to cover the rails is the same as the shade.

The worlds only insulating blind

Odysee Cellular Blinds are in a class by themselves as the only window treatment that blends the operational features of a blind with the softness of a cellular shade. This innovative blind offers three beautiful choices: clear view, complete privacy and anywhere in between.

With the vanes expanded, Odysee looks and functions like a conventional cellular shade. It serves as an energy efficient barrier, limiting air movement and preventing excessive solar heat gain.

The vanes are always white to the outside, reflecting sunlight for an even greater insulating advantage. With vanes expanded halfway, the soft fabrics filter light for a warm glow. With the vanes compressed, Odysee is transformed into a soft blind treatment. The view becomes the focal point and the treatment recedes into the background.

Decide which hardware system best fits your needs; standard cord loop, Cordless PowerTouch™ and motorized options to easily raise or lower any blind.

Modern Simplicity

Privada Linen Light Filtering in color Pesto

Privada Pleated Shades are defined by their modern simplicity with a series of popular colors and appealing textures for added visual interest.

By moving the operating cords from the front to the back, all you see is the beauty of the Privada fabric with its firm, crisp fabric pleat. A hidden fabric tab conceals the cords behind the shade to curtail light leakage and increase privacy.

All Privada light filtering and blackout fabrics are white to the outside for exterior continuity and offer quality ultra-violet protection. Choose the hardware system that best fits your needs; standard cord lock, cordless, cord loop and motorized options to easily raise or lower any shade.

Cellular Shades Collection & Odysee™ Cellular Blinds

LIMITED LIFETIME WARRANTY

Our commitment to quality, as with all Comfortex Window Fashions, is extended to all Comfortex Cellular Shades, Privada Privacy Pleated and Odysee Cellular Blinds in the form of a limited lifetime warranty.

Our limited lifetime warranty is extended exclusively to the original purchaser of the product. Comfortex limits this warranty to covering materials and workmanship. Comfortex will not cover damages caused by accidents, misuse or failure due to the improper installation or application of the product.
