

Reliable. Affordable... And Now Rechargeable!

Comfortex Window Fashion's Simplicity Motorized Shades provide reliable motorization at an affordable price. And now, no need to ever replace your batteries; keep your shades powered with the **new rechargeable battery option** for remote control motorization. Rechargeable motorization...

Lessen your impact on the environment while saving money!

Comfortex
WINDOW FASHIONS

Simplicity Motorization offers a variety of benefits.

Comfortex Window Fashions with Simplicity Motorization provides safety, convenience and reliability all at an affordable price.

Easy Operation: Raise, lower and tilt your shades with the touch of a button. No more fiddling with cords or manually adjusting each window to your favorite position. The tedious task of operating a group of shades is now simplified. Simplicity Motorization is the ideal solution for hard to reach or oversized windows.

Child Safety: The cordless design eliminates potential child and pet safety hazards.

Privacy and Light Control: By pushing a button, shades can be opened or closed on demand to provide privacy and light control when needed.

Affordability: Wireless remote control is an affordable option to control your window shades without any operating cords.

Quality and Reliability: Simplicity motors are backed by a 5 year warranty in conjunction with a Comfortex Limited Lifetime Warranty for the shade.

Simplicity Remote Control Shades now available with rechargeable batteries!

Simplicity Shades can be powered by a discrete and easy-to-use custom rechargeable battery pack. This exciting new option will provide you with many benefits.

More Environmentally Friendly: Rechargeable batteries have a considerably smaller impact on the environment than disposable batteries when comparing serviceable life.

Long Lasting Charge: Simplicity Shades can be operated for up to one full year on a single charge. And, you can recharge the batteries up to 500 times!

Save Money: No need to replace expensive disposable batteries over and over again. Rechargeable batteries last for many years.

Style: The battery stays out of sight inside the headrail or discreetly behind any set of window shades.

Easy Installation: The integrated battery pack has been designed for quick and easy installation. No wiring necessary. All motors are pre-programmed at the factory.

Easy Maintenance: When the motors show signs of slowing, simply plug the charger into the charging port on the shade and plug into a standard household outlet to recharge overnight.

Simplicity Motorization is available with many Comfortex products.
